

ARISTOS-COFUND POSTDOCTORAL PROGRAMME IN BIOMEDICINE AND HEALTH SCIENCES (MSCA-COFUND)**CALL 2023 FOR CANDIDATES FOR POSTDOCTORAL POSITION****Provisional list of total evaluation scores**

Following the evaluation by the external peer-reviewers, the shortlisted projects (score over 70% threshold) were called to an interview and were screened by the ARISTOS Ethics Committee to check if they comply with the ethical requirements of the call.

Proposals that raised ethics concerns were flagged for further ethics clearance and if some aspects are incomplete, clarification is sought. Selected Fellows will be required to respond to the Committee's assessment after the acceptance of their project but before the start of their contract.

Interviews were scheduled **via videoconference**. Interview panels per Area were formed by four examiners: a CIBER PI with no direct benefit from the ARISTOS Program, a non-Spanish member of the Scientific Advisory Board (not based in Spain) with expertise in the same research field with the proposal, a representative of the private sector (belonging to one of the associated partners) and a representative of CIBER Human Resources Department. All interviews lasted 45 minutes (maximum), starting with a 10 minutes presentation of the project, followed by a scientific discussion, **for the overall assessment of the nonscientific personal skills**. Each evaluator indicated their personal evaluation, according to the interview award criteria, to subsequently arrive to a global consensus for the interview phase.

Each applicant's final mark is based on the evaluation of the submitted proposal (70%) and the interview assessment (30%). Candidates should again **exceed a threshold of 70%** in the total score to be appointed. Candidates are ranked according to their total evaluation scores in 13 **ranking lists (one per panel – CIBER Thematic Areas)** in descending order, provided they are above the threshold. **If the number of candidates exceeding the threshold is higher than the number of foreseen positions in each panel, reserve lists are created.** All applicants will receive their individual evaluation report (available through the website Personal Area) and will have a **10-day period to file a complain.**

On May 9, 2024, the Recruitment Committee met and has agreed:

- 1.- To merge the interview and peer-review scores (the appointment of Fellows was afterwards validated by the Steering Committee).
- 2.- To approve the **provisional list of total evaluation scores.**

The provisional list of total evaluation scores (Annex I) is published in this document. Each candidate will also be informed by email and through the website personal area. **Once the final list is published, admitted fellows will be contacted by ARISTOS program manager for the initiation of the hiring process.** The selected Fellows will have to communicate the acceptance of the fellowship through a Researcher Declaration within a maximum period of 2 weeks, counting from the date of notification, and must be available to join the program within the following 5 months.

Co-funded by
the European Union

ARISTOS has received funding from the European Union's Horizon Europe research and innovation programme under the Marie Skłodowska-Curie grant agreement No 101081334

IMPORTANT INFORMATION:

Please note, each CIBER Thematic Areas had a particular interview panel, therefore interview panels with different evaluation perception. Scores of different Thematic Areas are not comparable.

Candidates in reserve list of any CIBER Thematic Area might be appointed in case appointed fellows do not accept their fellowship or in case extra funding is provided to cofund additional postdoctoral positions.

DEADLINE FOR REQUESTS FOR REDRESS:

Candidates have the opportunity to submit an appeal against the score of his/her proposal if they believe the score was based on an error in the evaluation procedure. See ARISTOS Redress Template among the templates of the Download area of ARISTOS website <https://postdoc-aristos.com/HowToApply>

All requests for redress have to be uploaded through the personal area website. The redress will only evaluate the evaluation procedure and perceived incorrect application of the eligibility criteria and not the scientific judgement of the peer reviewers.

Redress deadline: 06/06/2024, 16pm Madrid, Spain

ARISTOS has received funding from the European Union's Horizon Europe research and innovation programme under the Marie Skłodowska-Curie grant agreement No 101081334
